Islamabad

Summary

I have been working in the industry for almost a year, during which I have developed skills in Ruby on Rails and web development. I am passionate about creating efficient and scalable web solutions and am dedicated to delivering quality work. I would be grateful for the opportunity to contribute and grow further with your team.

Personal Projects

CHATSPHERE

Ruby on Rails/ HTML/ CSS/ Javascript/ Devise/ Git & Github

Developed **ChatSphere**, a real-time chat application using Ruby on Rails. Features include seamless user authentication, chat room management, media sharing, and real-time user status updates. Designed for efficient and secure communication with a clean, user-friendly interface.

LOOM-LEGACY

Ruby on Rails/ HTML/ CSS/ Javascript/ Devise/ Git & Github

LOOM-LEGACY is a comprehensive Rails-based application designed for managing the operations of a textile company. It integrates various departments, including production, inventory, and sales, allowing for seamless coordination and tracking. Built with modern web technologies, the app is deployed on AWS EC2 and utilizes PostgreSQL for data management

Banking Managment System

C++/My SQL

The **Banking Application** handles essential banking functions like deposits, withdrawals, and balance inquiries. It supports account openings, customer profile management, and loan processing. The system ensures secure transactions, tracks account activity, and manages interest rates and loan repayments, all while providing a user-friendly interface and robust security.
