I would be honored to work with you.

EXPERTISE

- C++
- OOP
- Web Development
- Relational DBMS
- Ruby on Rails
- DSA

PROJECTS

Banking Application in C++

I developed a Banking Management System connected to a MySQL database to store all banking data. It covers essential banking functionalities, including account opening, deposits, withdrawals, and loans.

SF-36 Health Survey Management System

I developed a project for the SF-36 health survey, which takes user input for 36 questions and processes the data to provide final percentages for 8 health domains. This project can handle bulk data in CSV format, transfer it to a MySQL database, and fetch data for individual patients to generate separate reports.

Textile Management System Empowering Employee Efficiency

I have developed a Web Application for a Textile company using Ruby on Rails. The application includes functionality for managing 15 departments and supports 53 distinct employee roles, including the CEO. Each employee has their own secure portal where they can log in and efficiently carry out their daily tasks.
